JOURNAL OF APPLIED GEOPHYSICS

Contents Volume 37, 1997

Research Papers

Fractured rock mass characterization parameters and seismic properties: Analytical studies
F.K. Boadu 1

Motion-induced noise from vibration of a moving TEM detector coil: characterization and suppression
M.S. Munkholm 21

Shape and depth solutions from numerical horizontal self-potential gradients
E.M. Abdelrahman, A.A. Ammar, S.M. Sharafeldin and H.I. Hassanein 31

Fast method of resistivity sounding for shallow groundwater investigations
G.S. Yadav, P.N. Singh and K.M. Srivastava 45

Discussion

Analytical solution for direct current electrical potentials in an arbitrarily anisotropic half-space
* Comment — P. Valla 53
* Reply — Ping Li 53

Research Papers

Statistical pattern recognition technique to enhance anomalies in magnetic surveys
I. Rosati and E. Cardarelli 55

The gravity anomaly field in the Gulf of Bothnia spatially characterized from satellite altimetry and in situ measurements
J.P. Noréus, M.R. Nyborg and K.L. Hayling 67

Study of the Chaves geothermal field using 3D resistivity modeling
F.A. Monteiro Santos, A.R. Andrade Afonso and L.A. Mendes Victor 85

The inversion of geoelectrical data for hydrogeological applications in crystalline basement areas of Nigeria
A.I. Olayinka and A. Weller 103

Rapid methods for interpretation of induced polarization anomalies
B. Khesin, V. Alexeyev and L. Eppelbaum 117

Special Issue

METHODS FOR MODELLING ELECTROMAGNETIC FIELDS

edited by J.T. Weaver and M.S. Zhdanov

Foreword 131

Methods for modelling electromagnetic fieldsResults from COMMEMI—the international project on the comparison of modelling methods for electromagnetic induction
M.S. Zhdanov, I.M. Varentsov, J.T. Weaver, N.G. Golubev and V.A. Krylov 133
